

Hospital Results

Table Notes

Total Number of Cases includes all adult total knee and hip replacements, elective and non-elective.

30-Day Readmissions includes readmissions to any general or specialty acute care hospital in Pennsylvania. Only elective knee and hip replacements are included in the readmission analysis. Non-elective, clinically complex cases are excluded. Out-of-state residents are also excluded because readmission data is not available for patients readmitted to a non-Pennsylvania hospital. Readmission rates do not count planned readmissions, which are identified through a set of criteria used by the Centers for Medicare and Medicaid Services' planned readmission algorithm. See Technical Notes for further detail about the algorithm and other exclusions.

Average Hospital Charge is for the entire length of stay and is trimmed and case mix adjusted. In almost all cases, hospitals typically receive actual payments from private insurers or government payers that are considerably less than the listed charge.

Hospital	Total Number of Cases	30-Day Readmissions	Average Hospital Charge
Statewide			
Knee	35,353	3.9%	\$52,912
Hip	18,416	4.3%	\$55,493

Understanding the Symbols

The symbols displayed in this report represent a comparison of a hospital's actual rate of readmission to its expected rate, which takes into account varying illness levels among patients.

- Rate was significantly lower than expected.
- ⊙ Rate was not significantly different than expected.
- Rate was significantly higher than expected.

NR: Not reported. Too few cases after exclusions.
