QUESTION**

**MULTIPLE
CHOICE**

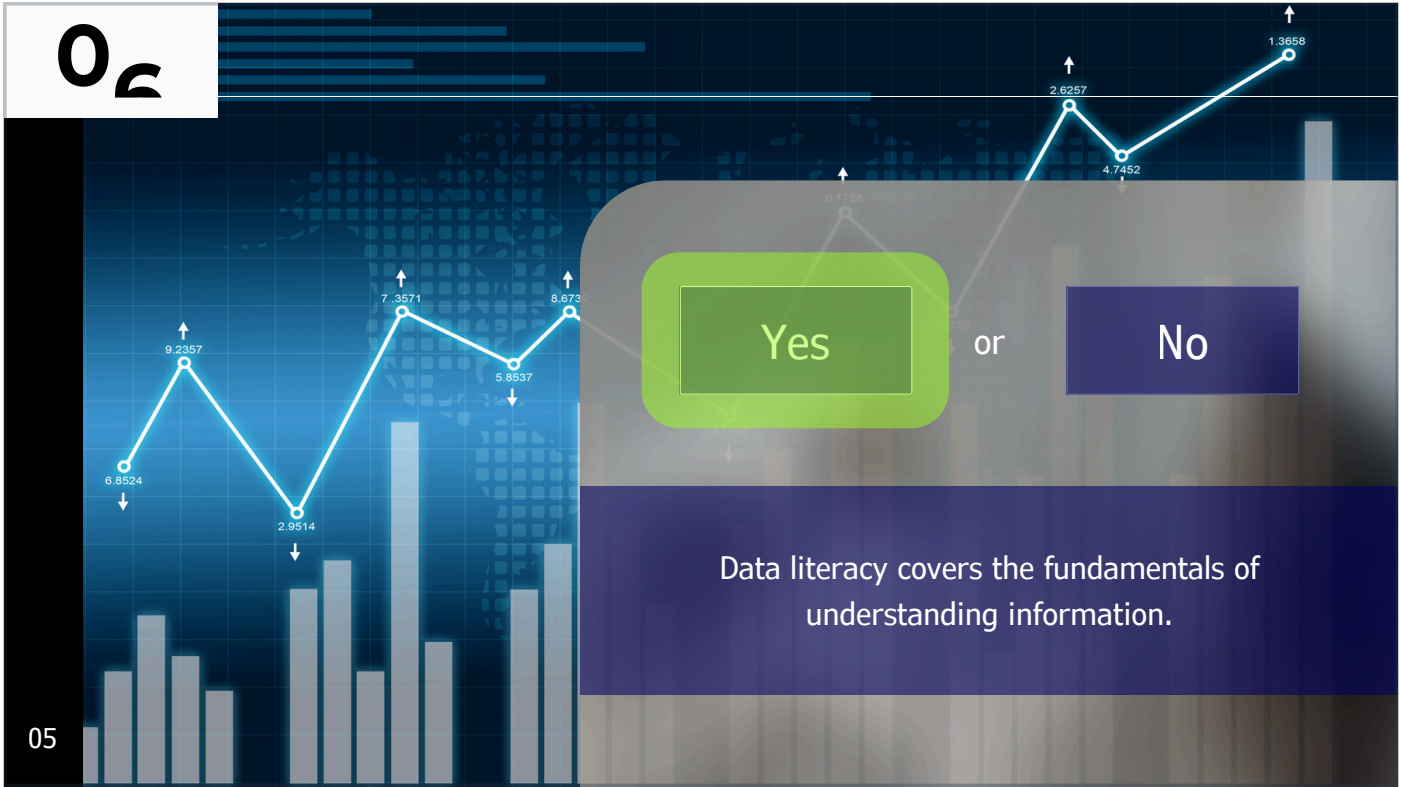

03

PART 1

A Foundation of Fluency

04

True

or

False

Evaluating data sources, identifying biases, and recognizing potential limitations of data analysis is important.

06

True

or

False

Verifying the collection method of data within a study does not help identify the validity of the data.

PART 2

Interpreting Data

09

06

ANALYZE

ENGAGE

REASON

UNDERSTAND

These are the
four pillars of
interpreting data.

True

or

False

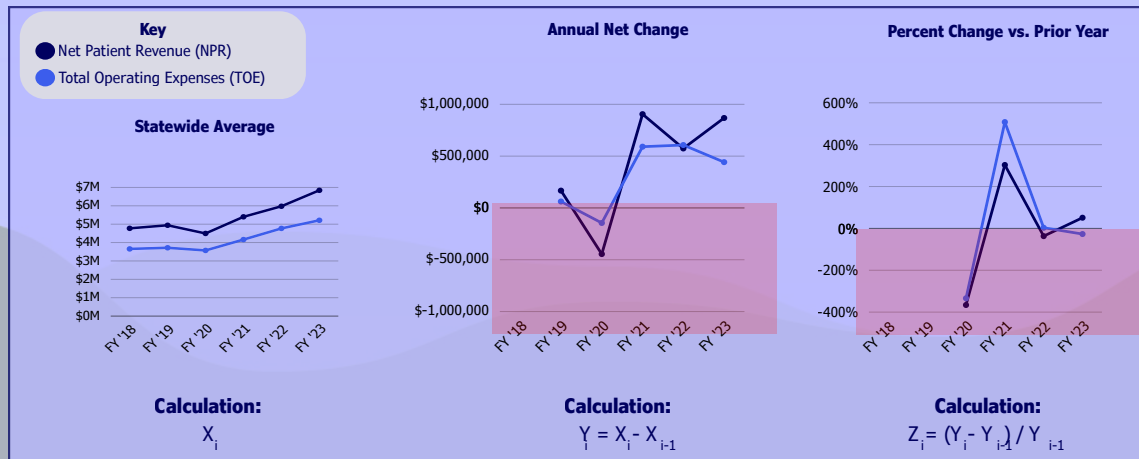

10

06

These three graphs, show the same data can be manipulated in different ways to communicate multiple messages:

TRUE

FALSE

11

This visualization displays operating and non-operating income as a percentage.

0%

TRUE

FALSE

12

The visualization shows change in percentage over a ____ year period.

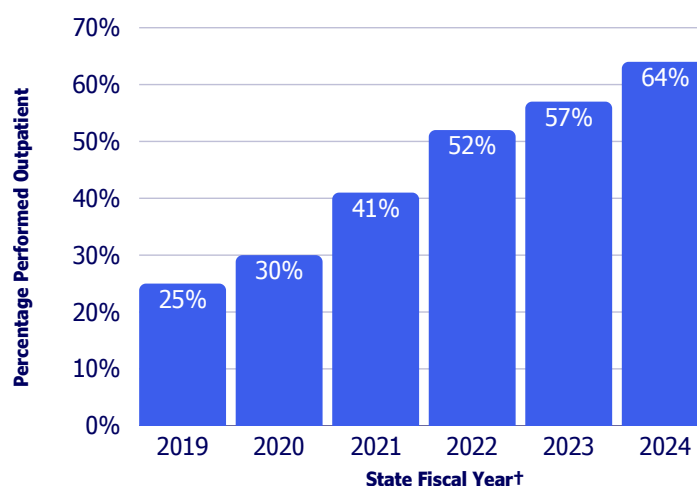

FOUR

SIX

THREE

FIVE

Figure 1. Percentage of Prostate Cancer Surgery Performed in an Outpatient Setting

† State fiscal years reflect twelve consecutive months beginning in July and ending in June.

The visualization represents _____ on the X axis.

STATE FISCAL YEAR

CANCER SURGERY

PERCENTAGE
PERFORMED

OUTPATIENT SETTING

Figure 1. Percentage of Prostate Cancer Surgery Performed in an Outpatient Setting

† State fiscal years reflect twelve consecutive months beginning in July and ending in June.

PART 3

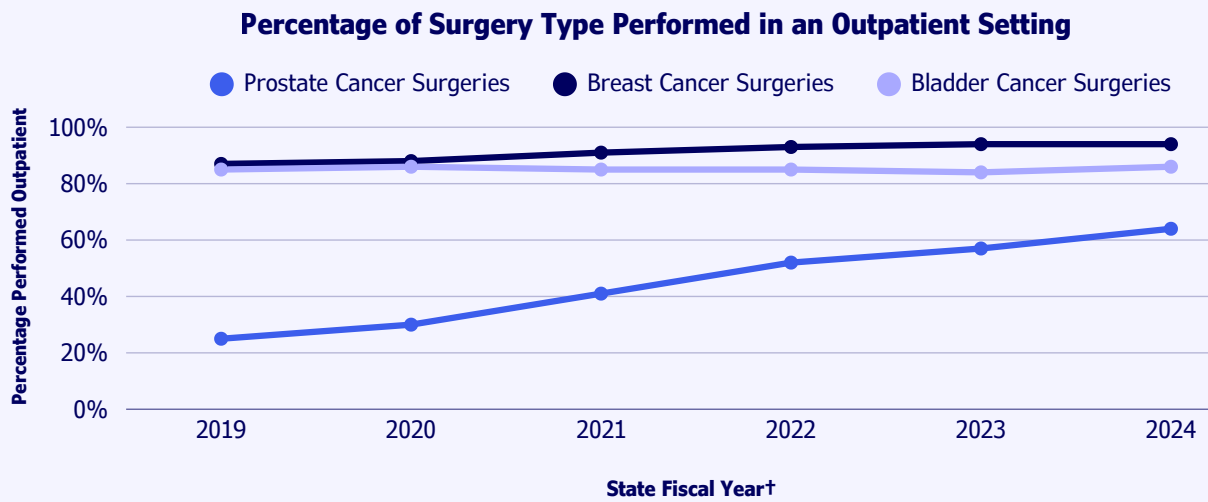

Communicating Visualizations and Data

16

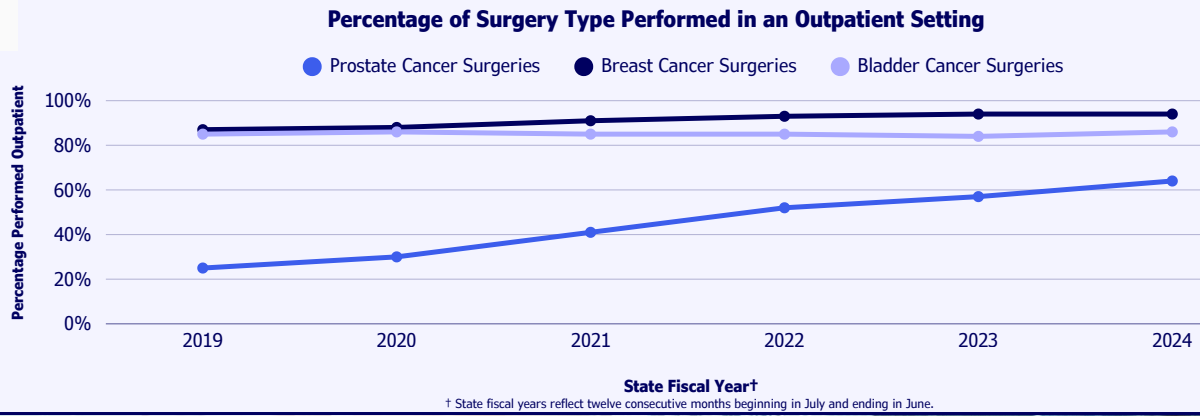

The definition of State Fiscal Year† is necessary for this visualization to be effectively communicated.

YES

NO

02

This time period would be most appropriate for the general population.

YES

NO

02

The below visualization has all the necessary components needed to be transferrable amongst populations, while remaining transparent.

TRUE

FALSE

19

Once I know my data source is factual and trustworthy, and I know how to measure my topic of interest, the next delivery detail I need to consider is:

SETTING

SUPPORTING ARGUMENTS

DISCUSSION TYPE

TARGET AUDIENCE

02

Given the blank table and randomized details below, how would you place each detail of delivery in order to correctly complete the table? We will place the first few together.

Details of Delivery						
Data Source	Unit of Measurement	Target Audience	Desired Outcome	Setting	Discussion Type	Supporting Arguments
CDC Prediabetes Risk Test	Risk Score from 1 to 10	Patients	Healthier Habits and Lower Risk of Diabetes	Practice Exam Room	Patient Advice	Historical Patient Risk Scores

~~Historical Patient Risk Scores~~

~~Patients~~

~~Patient Advice~~

~~Risk Score from 1 to 10~~

~~Practice Exam Room~~

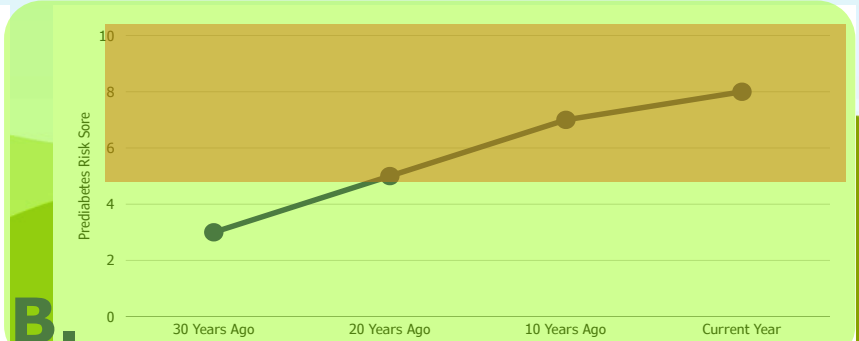

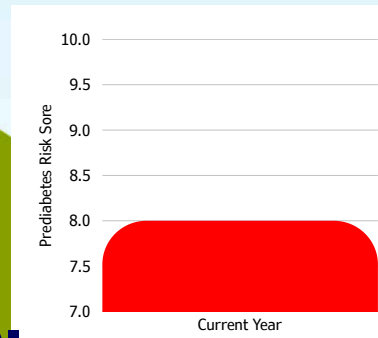

~~CDC Prediabetes Risk Test~~

~~Healthier Habits and Lower Risk of Diabetes~~

Using the example previously given, can you determine if visualization A or B is more appropriate for your use?

Details of Delivery

Data Source	Unit of Measurement	Target Audience	Desired Outcome	Setting	Discussion Type	Supporting Arguments
CDC Prediabetes Risk Test	Risk Score from 1 to 10	Patients	Healthier Habits and Lower Risk of Diabetes	Practice Exam Room	Patient Advice	Historical Patient Risk Scores
