

# Hospital Medicare Payment (2014 Data)

## Table Notes

**Number of Cases** displays the number of cases included in the **Average Medicare Payment**.

**Average Medicare Payment** reported in this section includes payments made to hospitals for Medicare fee-for-service patients (PA residents) who underwent CABG and/or valve surgery and were discharged between January 1, 2014 and December 31, 2014—the most recent Medicare payment data available. The Medicare payment data was obtained from the Centers for Medicare and Medicaid Services (CMS). Payments from Medicare Advantage plans are not included nor are patient liabilities (e.g., coinsurance and deductible dollar amounts).

**Average Hospital Charge** is reported for Medicare fee-for-service patients (PA residents discharged between January 1, 2014 and December 31, 2014). It reflects the entire length of the hospital stay and was trimmed and case-mix adjusted. Hospitals typically receive actual payments that are considerably less than the listed charge.

See **Technical Notes** for further details.

	Number of Cases	Average Medicare Payment	Average Hospital Charge
<b>Statewide Statistics</b>			
CABG without Valve	1,853	\$32,499	\$166,938
