

RESEARCH BRIEF

Asthma Hospitalizations in Pennsylvania

Asthma is a chronic disease characterized by inflammation of the airways in the lungs. Examining hospital admissions for asthma is one way to observe the quality of care provided to Pennsylvania residents with asthma. Timely diagnosis, effective primary care, and appropriate disease management can potentially prevent hospitalizations for asthma. This research brief focuses on hospitalizations for Pennsylvania residents (all ages) who were admitted to a Pennsylvania acute care hospital with a diagnosis of asthma. Trends are shown for federal fiscal years (FFY)* 2016 through 2024, with additional focus on hospitalizations from FFY 2023 through FFY 2024.

The total number of asthma hospitalizations for Pennsylvania residents declined from FFY 2016 to FFY 2021, then increased from FFY 2021 to FFY 2024.

Number of Asthma Hospitalizations in Pennsylvania Federal Fiscal Year 2016 to 2024

The results below (except for page 5) focus on the more recent 15,796 hospitalizations from FFY 2023 through FFY 2024.

* Federal fiscal year reflects twelve consecutive months beginning in October and ending in September.

RESEARCH BRIEF

Asthma Hospitalizations, FFY 2023-2024 by Patient Characteristic

Population Characteristic		Hospitalization Rate per 10,000 PA Residents ¹	Number of Hospitalizations	Average Length of Hospital Stay ² (in days)
Statewide		12.2	15,796	2.9
Age	Less than 18 years	23.4	6,192	1.9
	18-39 years	5.8	2,136	2.7
	40-64 years	10.6	4,311	3.6
	65 years and older	12.2	3,157	3.9
Sex³	Female	14.3	9,400	3.2
	Male	10.0	6,394	2.4
Race and Ethnicity	Black, non-Hispanic	40.5	5,686	2.8
	Hispanic	20.6	2,382	2.6
	White, non-Hispanic	6.7	6,422	3.2
	Other, non-Hispanic	16.2	1,306	2.6
Poverty Rate⁴	Less than 10%	7.6	5,160	3.1
	10% to less than 25%	12.4	6,244	2.9
	25% or more	36.7	4,392	2.7
Rural/Urban Residency⁵	Rural	6.4	2,155	3.0
	Urban	14.2	13,641	2.9

¹Hospitalization rates were based on 2023 US Census Bureau population data.

²Only hospitalizations with valid length of stay were included.

³Only patients identified as female or male were included.

⁴Poverty rates were based on 2023 US Census Bureau estimates at the patient zip code level.

⁵Rural versus urban classification was determined by the patient's county of residence and based on the population density, according to the Center for Rural Pennsylvania.

Hospitalization rates were higher than the statewide baseline for:

- Residents age less than 18 years old
- Female residents
- Black (non-Hispanic) residents, Hispanic residents, and residents classified as Other (non-Hispanic)
- Residents who live in areas with a poverty rate of 10% or more
- Residents who live in urban counties

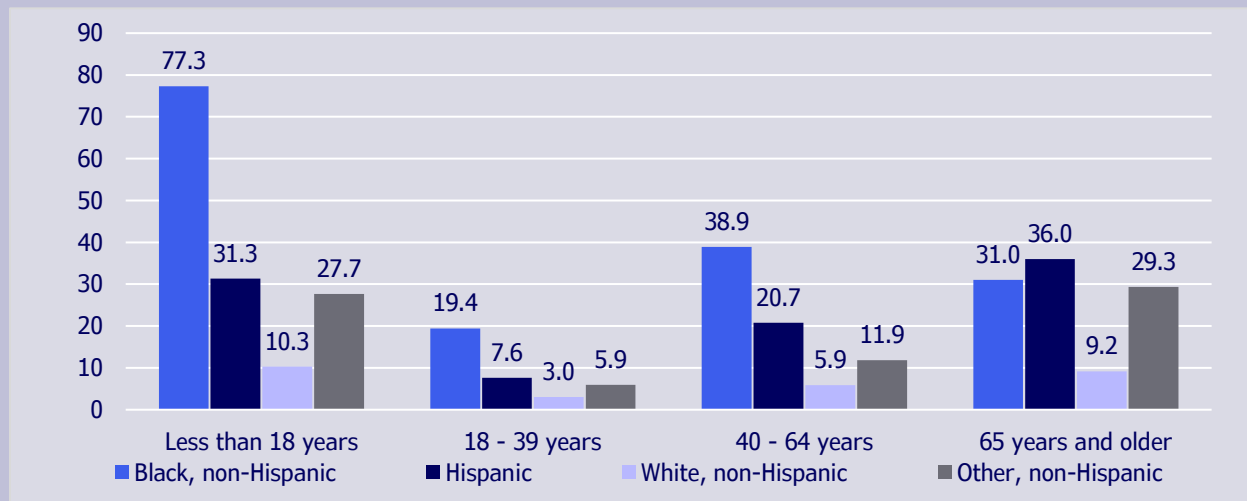

RESEARCH BRIEF

Asthma Hospitalization Rates per 10,000 Pennsylvania Residents, FFY 2023-2024, by Sex and Age

- For residents age less than 18 years, males had the highest asthma hospitalization rate.
- For each of the older age groups, females had the highest asthma hospitalization rates.

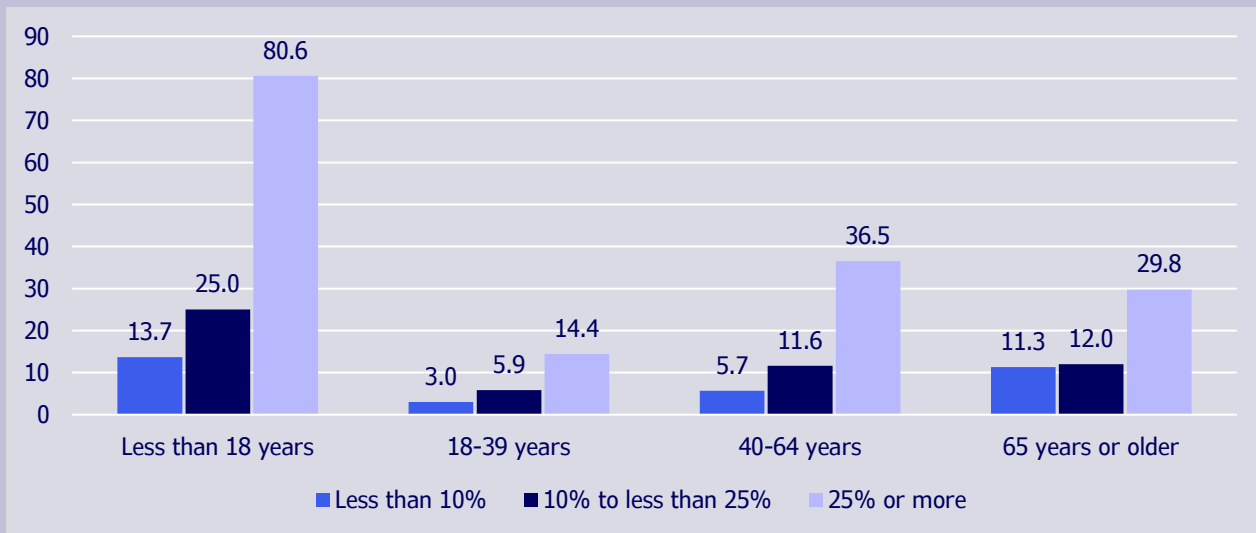

Asthma Hospitalization Rates per 10,000 Pennsylvania Residents, FFY 2023-2024, by Race/Ethnicity and Age

- Black, non-Hispanic residents had the highest asthma hospitalization rates for all age groups under age 65 years.
- Among residents age 65 and older, Hispanic residents had the highest asthma hospitalization rate.
- White, non-Hispanic residents had the lowest asthma hospitalization rates for all age groups.

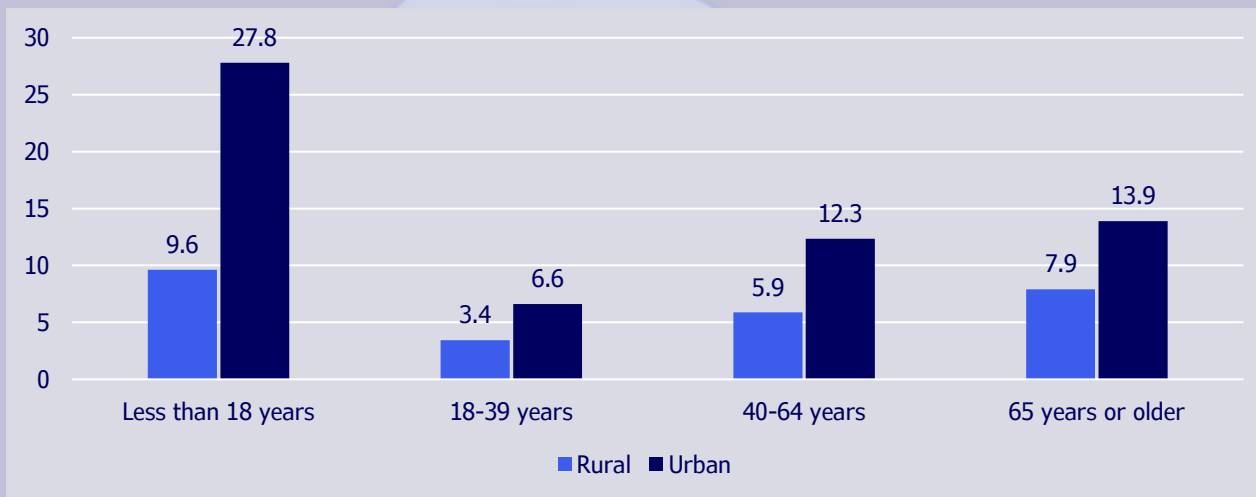

RESEARCH BRIEF

Asthma Hospitalization Rates per 10,000 Pennsylvania Residents, FFY 2023-2024, by Poverty Rate and Age

- Residents living in communities with a poverty rate of 25% or more had the highest asthma hospitalization rates for all age groups.
- Residents living in communities with a poverty rate of less than 10% had the lowest asthma hospitalization rates for all age groups.

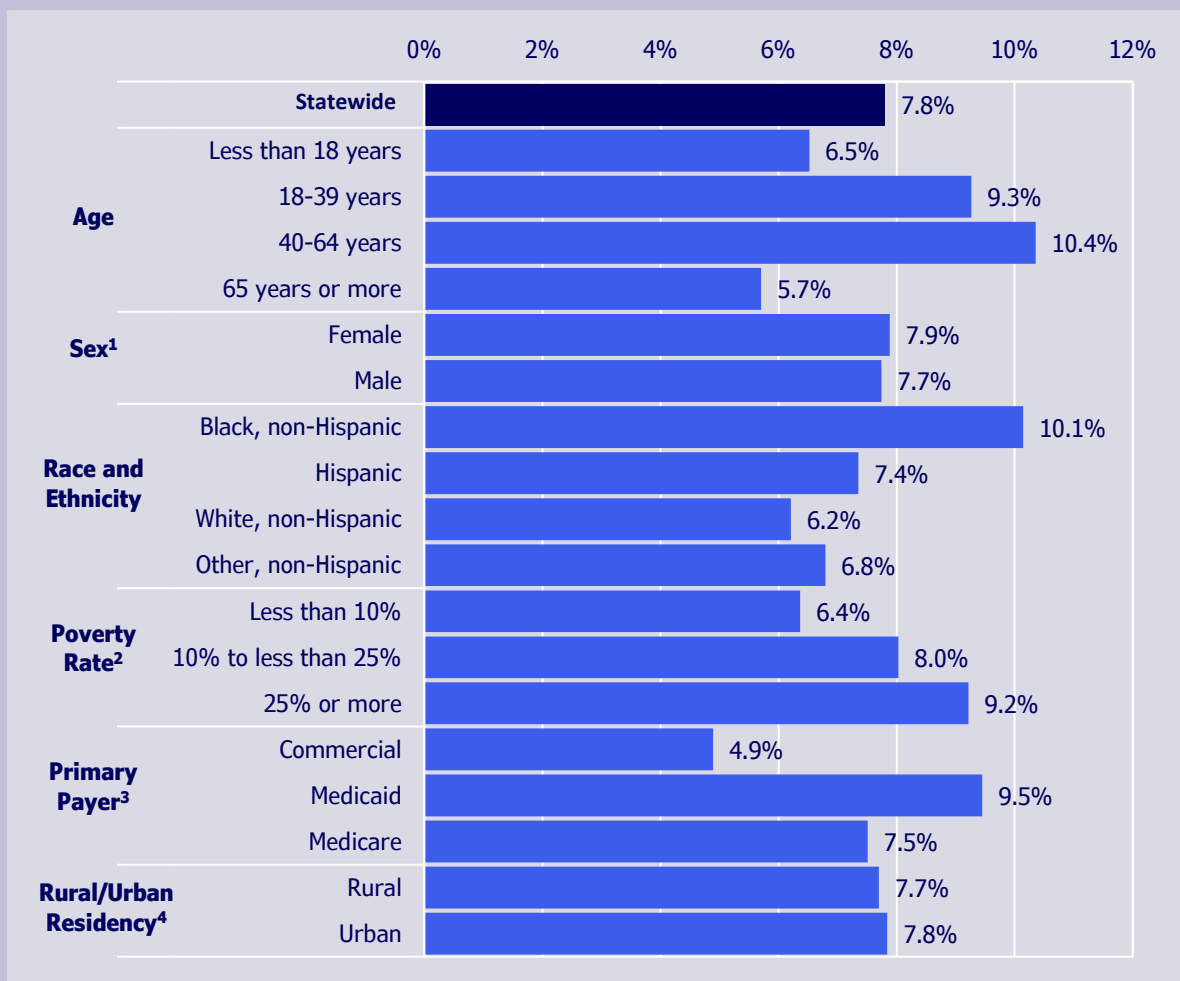

Asthma Hospitalization Rates per 10,000 Pennsylvania Residents, FFY 2023-2024, by Rural/Urban Residency and Age

- Residents living in urban counties had the highest asthma hospitalization rates for all age groups.

RESEARCH BRIEF

Readmissions for Asthma within 90 Days, FFY 2023, by Patient Characteristic

¹Only patients identified as female or male were included.

²Poverty rates were based on 2023 US Census Bureau estimates at the patient zip code level.

³Only patients identified as having commercial, Medicaid, or Medicare insurance were included.

⁴Rural versus urban classification was determined by the patient's county of residence and based on the population density, according to the Center for Rural Pennsylvania.

In FFY 2023, readmission rates varied across patient characteristics. By category, the highest rates of readmission for asthma were for:

- Patients age 40-64
- Female patients
- Black, non-Hispanic patients
- Patients who live in areas with a poverty rate of 25% or more
- Patients with Medicaid as the primary payer
- Patients who live in urban counties

NR: Not Reported due to low volume.

RESEARCH BRIEF

Asthma Hospitalizations per 10,000 Pennsylvania Residents, FFY 2023-2024

About PHC4

Created by the PA General Assembly in 1986, the Pennsylvania Health Care Cost Containment Council (PHC4) is an independent council charged with collecting, analyzing and reporting information that can be used to improve the quality and restrain the cost of health care in the state. Today, PHC4 is a recognized national leader in public health care reporting. PHC4 is governed by a council with members representing business, labor, consumers, health care providers, insurers, health economists and state government.

Barry D. Buckingham, Executive Director • 225 Market Street, Suite 400, Harrisburg, PA 17101
