

**Pennsylvania Health Care Cost Containment Council (PHC4)
Cardiac Procedures Report Summary, January 2020 through December 2021 Data**

The *Cardiac Procedures Report* released by Pennsylvania Health Care Cost Containment Council (PHC4) examines the performance of Pennsylvania acute care hospitals for five types of cardiac procedures: coronary artery bypass graft (CABG), percutaneous coronary intervention (PCI) for patients who had a heart attack, PCI for patients who did not have a heart attack, transcatheter aortic valve replacement (TAVR), and surgical aortic valve replacement (SAVR). Reported are hospital ratings for in-hospital mortality, 7-day, 30-day, and 90-day readmissions, and extended postoperative length of stay. Also included are volume of cases and hospital charges. Statewide trends and statistics are also examined. In depth information can be found in the individual reports for each cardiac procedure to help patients, families, and caregivers in making health care decisions. See www.phc4.org for the full report.

Cardiac Procedure	Total Number of Cases	Mortality	Readmission		
			7-Day	30-Day	90-Day
CABG	13,145	1.5%	4.0%	9.5%	14.5%
PCI for a Heart Attack	24,127	1.8%	3.8%	8.4%	13.9%
PCI without a Heart Attack *	9,189	1.0%	4.7%	12.4%	22.4%
SAVR	3,073	2.1%	3.5%	9.6%	13.1%
TAVR *	9,064	0.6%	4.6%	9.7%	16.2%

* Due to the limited number of cases, mortality rates are not available in the Hospital Results section of the report.

* Due to the limited number of cases, mortality rates are not available in the Hospital Results section of the report.

Cardiac Procedures Report Summary, January 2020 through December 2021 Data**

Postoperative Length of Stay (PLOS)

Cardiac Procedure	Average PLOS for All Cases (Days)	% of Cases with an Extended PLOS	Average PLOS for Cases with an Extended PLOS (Days)
CABG	6.3	3.6%	20.9
PCI for a Heart Attack	2.3	3.7%	8.8
PCI without a Heart Attack	2.2	4.3%	10.2
SAVR	6.7	3.1%	25.6
TAVR	2.1	5.1%	8.6
